

AMENDMENT TO THE SPECIFICATION

Please amend the Abstract of the Disclosure as follows:

A liquid crystal display ~~having~~ comprises an injection hole post structures compatible with liquid crystal ~~are~~ formed in an area near an injection hole to prevent pollutants seeped from an end-sealing material from penetrating into a display area, thereby suppressing the ~~occurrence~~ deterioration of picture quality ~~trouble which easily occurs~~ in the display area. The liquid crystal display ~~includes~~ comprises a first substrate ~~11~~ and a second substrate ~~12~~ ~~which are~~ ~~disposed with~~ having a predetermined gap therebetween, ~~in which~~ liquid crystal is sealed in the gap. The liquid crystal display ~~further includes~~ comprises post structures for controlling the gap, and a sealing material provided outside the display area for sealing the liquid crystal in the gap, and forming the open injection hole for injecting the liquid crystal therethrough; ~~the end-sealing material 16 for sealing~~ seals the injection hole after the liquid crystal is sealed ~~in~~; and ~~injection hole post structures are provided in the area near the injection hole, for dividing the injection hole 15 into a plurality of portions by using the same material as the post structures.~~
